

TARTLE

This Tartle is designed for two different sized tart trays that are in common use. You may need to change the dimensions for other tart trays.

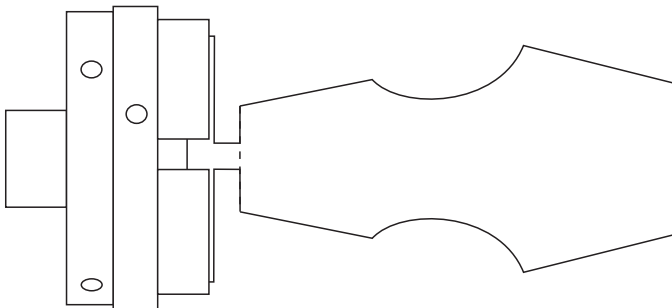

Start with a block 130mm long and 65mm square. Straight-grained wood which will withstand frequent washing is recommended.

This may be turned between centres but it is easier to obtain a good finish if a chuck is used.

Turn and sand all the available surface. Do not apply any finish.

Part off leaving a flat end which is hand sanded.
